CAREER OBJECTIVE

Artificial Intelligence and Data Science student with strong experience in machine learning, deep learning, data analytics and full-stack development. Experienced in developing intelligent applications, predictive models and REST APIs.

EDUCATION

B.Tech – Artificial Intelligence and Data Science

XYZ Engineering College, Coimbatore

2023 – 2027

SKILL SET

Python

Java

C++

JavaScript

SQL

Machine Learning

Deep Learning

Artificial Intelligence

Natural Language Processing

Computer Vision

TensorFlow

PyTorch

Scikit-learn

Pandas

NumPy

Matplotlib

ReactJS

Flask

Spring Boot

REST API

Git

GitHub

Docker

AWS

PROJECTS

AI-Based Student Placement Prediction System

Developed a machine learning-based placement prediction system using academic performance, technical skills and student profile information.

Implemented preprocessing, classification and probability prediction to estimate student placement outcomes.

Integrated Explainable AI using SHAP to identify factors supporting and reducing placement probability.

Explainable AI Cybersecurity Framework

Developed an AI-powered cybersecurity framework for detecting network attacks using machine learning.

Processed more than 80,000 network traffic records from the CICIDS2017 dataset.

Implemented SHAP-based explanations to provide interpretable threat analysis.

Developed a Flask REST API for real-time prediction and explanation.

Customer Behavior Analytics System

Developed a machine learning system to analyze customer purchasing behavior.

Applied clustering and classification algorithms to identify customer segments and predict purchasing patterns.

Performed exploratory data analysis using Pandas, Matplotlib and NumPy.

Full-Stack Customer Support System

Developed a full-stack customer support application using ReactJS and Spring Boot.

Implemented REST APIs for ticket creation, status tracking, priority management and customer interaction.

Integrated frontend and backend components for real-time ticket management.

INTERNSHIPS

AI/ML Intern

ABC Technologies

May 2026 – June 2026

Worked on machine learning model development, data preprocessing, feature engineering and model evaluation.

Developed predictive models using Python and Scikit-learn.

Worked with real-world datasets and improved model performance through feature engineering.

Software Development Intern

XYZ Solutions

May 2025 – June 2025

Worked with Python, SQL and data processing.

Developed data analysis solutions and created visualizations using Pandas and Matplotlib.

CERTIFICATIONS

AWS Cloud Practitioner Essentials

IBM Data Science Professional Certificate

Machine Learning Certification

MongoDB Developer Certification

Microsoft Azure Fundamentals

ACHIEVEMENTS

Selected Participant – Smart India Hackathon 2025

Participated in national-level technical competitions and developed solutions for real-world problem statements.

Completed multiple machine learning and full-stack development projects.
