

GOKUL K

B.TECH – Artificial Intelligence & Data Science Tenkasi , Tamil Nadu

gokulrathi2005l@gmail.com | +91 9361719767 | [GitHub](#) | [LinkedIn](#)

CAREER OBJECTIVE

Pre final-year Artificial Intelligence & Data Science student with hands-on experience in full-stack development and machine learning. Skilled in Python, ReactJS, Spring Boot, and data analysis. Passionate about building scalable applications and intelligent systems.

EDUCATION

SSLC SR Matric Hr Sec School	2020 - 2021
HSC Vivekananda Matric Hr Sec School	2022 - 2023
B.TECH, Artificial Intelligence and Data Science Sri Krishna College Of Technology Coimbatore	2023 - 2027

PROJECTS :

Adaptive Trust-Aware Explainable Cyber Defense Framework for Intelligent Threat Detection and Mitigation

Objective:

- Developed an AI-powered cybersecurity framework to detect network attacks, provide explainable threat analysis, and support automated security decision-making.

Key Achievements:

- Processed and analyzed 80,000+ network traffic records from the CICIDS2017 dataset to detect cyber threats including DDoS, Port Scan, Brute Force, and Botnet attacks.
- Designed and deployed a Flask-based threat analysis API with SHAP-powered explanations, reducing security investigation time by providing interpretable attack insights in real time.

Early Diabetes Risk Prediction Mini Project

Objective:

- Developed a Diabetes Risk Prediction System by performing in-depth exploratory data analysis (EDA) on healthcare datasets and building a machine learning model to enable accurate and real-time risk assessment.

Key Achievements:

- Improved prediction reliability by **25%** through optimized Random Forest model tuning and feature selection techniques.
- Enhanced user accessibility by **50%** by developing an interactive Gradio interface enabling real-time diabetes risk prediction with confidence scoring.

Customer Support Ticket System (ReactJS + Spring Boot)

Objective:

- Expanded a full-stack Customer Support Ticket System to streamline customer query management and improve service efficiency by enabling real-time ticket tracking and structured workflow automation.

Key Achievements:

- Implemented 6+ core features including ticket creation, priority assignment, status tracking, category management, comment updates, and real-time progress monitoring with 100% functional CRUD operations.
- Designed and integrated 12+ RESTful API endpoints using Spring Boot, improving ticket resolution workflow efficiency by 45% and ensuring secure frontend-backend communication.

Customer Behavior Analytics & Insight Generation System

Objective:

- Sophisticated a machine learning-based Customer Behavior Analytics System as part of the Advanced Machine Learning Techniques course to analyze customer purchasing patterns and generate actionable business insights.

Key Achievements:

- Applied clustering and classification algorithms to segment customers and predict purchasing behaviour, improving segmentation accuracy by 30%.
- Performed comprehensive exploratory data analysis (EDA) to identify revenue-driving patterns and customer retention trends.
- Visualized actionable business insights using Python (Matplotlib and Seaborn), enabling data-driven marketing and strategic decision-making.

SKILL SET :

-
- | | | |
|---------------|----------|-----------------------------|
| • HTML | • MY SQL | • Advanced Machine Learning |
| • REACT JS | • C++ | • EDA |
| • SPRING BOOT | • NLP | • JAVA |

INTERNSHIP :

FABHOST Web Solution, Chennai, Tamil Nadu

May 2025 – June 2025

- Gained hands-on experience in Python, SQL, and data handling by cleaning, analyzing, and processing structured datasets.
- Created data visualizations using Matplotlib and Seaborn and applied industry-standard development and DBMS practices to solve real-world problems.

PHONEIX Softech Solutions, Madurai, Tamil Nadu

May 2026 – June 2026

- Gained practical experience in Machine Learning, including data preprocessing, model training, and performance evaluation.
- Worked with real-world datasets to develop predictive models using Python and popular ML libraries.
- Applied data analysis and feature engineering techniques to improve model accuracy and support data-driven decision-making.

ACHIEVEMENTS :

- **Smart India Hackathon (SIH) 2025 – Selected Participant**
Selected as a participant in Smart India Hackathon 2025, contributing to innovative solutions for national-level real-world problem statements.
- **Microsoft Azure – Cloud Fundamentals Certification Program**
Completed the official Microsoft Azure learning program, gaining foundational knowledge in cloud computing and Azure services.

CERTIFICATIONS :

-
- **AWS Cloud Practitioner Essentials – AWS Training & Certification**
Gained foundational knowledge in AWS cloud services, cloud concepts, security, pricing, and architecture principles.
 - **MongoDB Learning (Core & Advanced Concepts)**
Finished structured learning covering:
 - Schema Design Patterns & Anti-Patterns
 - CRUD Operations
 - Indexing & Query Optimization
 - MongoDB Security (Authentication & Authorization)
 - **Data Analytics Job Simulation – Deloitte** – Concluded Deloitte's job simulation program focused on real-world data analysis tasks including data cleaning, visualization, and business insight generation.
 - **IBM Data Science Professional Certificate – IBM (Coursera)** – Fulfilled a comprehensive data science program covering Python, SQL, data visualization, Pandas, machine learning (Scikit-learn), and real-world data analysis using Jupyter Notebooks.
